

FASH Workshops and Covid - updated September 2023

Unfortunately Covid has recently become more prevalent, so it is particularly important for each of us to behave responsibly and be mindful of the safety of others.

What you can do

We assume that people have been fully vaccinated, including any booster jabs, as this is the best way to keep everyone safe.

Please stay at home if you are at all unwell and especially if you have any cold-like symptoms such as excessive coughing, sneezing, a runny nose, sore throat, headache or unexpected fatigue. It is obviously not desirable to pass on any viral illness if it can be avoided, although you might want to consider doing a lateral flow test just to check.

In dance workshops, if you prefer to stay with the same partner or to use a cross hand hold for swinging rather than a ballroom hold, please let people know.

What we can do together

If you do find that you have contracted Covid within 5 days of having attended one of our workshops, we would appreciate your letting us know by emailing info@fash.org.uk. We can then inform those who also attended the workshop (and whose email address we have) that they may have been in contact with Covid. Your identity would of course be withheld.

We respect a person's choice to wear a mask at any time if they prefer. FFP2 or FFP3 certified masks are the most effective.

What we do

Some windows and doors will be opened to increase ventilation during workshops, unless severe weather makes that inappropriate.

The venues we use will have been cleaned and we will provide antiviral cleaners for use as required during each workshop.

We will make sure there is soap in the toilets and hand sanitisers will also be provided.

May you all enjoy safe and happy music and dance!
